

MADICO® CHARCOAL

Looks great.

WHEREVER THERE IS GLASS, WE CAN *improve* IT.

Madico has been developing innovative materials for nearly a century. An unrivaled commitment to research and development has enabled the company to pioneer a number of industry-first products and processes. Madico's cornerstone products consist of a suite of window films designed for virtually any application – commercial and residential energy control, automotive, safety and security and view control. The company's commitment to glass film innovation and responsible testing has helped it earn certifications from Factory Mutual, Underwriters Laboratories and other reputable agencies. The company's corporate headquarters and manufacturing complex are located in Woburn, Massachusetts. For additional information please call 1-888-887-2022 or visit us at www.madico.com.

And doesn't fade.

Madico's Charcoal™ auto tint combines classic looks with contemporary functionality to deliver everything you need in an auto film – along with added benefits. Charcoal not only rejects heat and adds privacy, it also helps reduce dangerous glare, offers a more comfortable ride and provides fade resistance to help keep your interior looking new for years to come.

Charcoal is available in a variety of shades to make customizing your car a simple task, while taking advantage of the pinnacle of tint technology. There's no better combination of quality, function and looks in automobile film anywhere.

If you're looking for a tint that provides disruption-free use of your cell phone, GPS, satellite radio and tire pressure monitors, our Charcoal films were developed to do just that—with the quality you'd expect from Madico.

For additional information please call 1-888-887-2022 or visit us at www.madico.com.

Charcoal is a cutting edge extruded film that never changes color.

- State of the art extruded film
- Improves comfort due to maximum heat and glare rejection
- Reduces fading of vehicle's interior
- Improves personal safety by blocking 99% of UV rays
- Non-metal construction eliminates signal interference
- Helps hold shattered glass together in the event of an accident
